Assistant Professor position @ Mizoguchi Research Group, IIS, Univ. Tokyo

Mizoguchi research group, Institute of Industrial Science, The University of Tokyo invites applications for an Assistant Professor position.

Mizoguchi research group is placed at the Institute of Industrial Science at Komaba-campus of the University of Tokyo. The group is investigating the structure-property relationships of advanced materials, such as semiconductor, ceramics, glass, liquid, gas, interface, etc, using simulation, atomic-resolution analysis, and machine learning.

This assistant professor belongs to the Mizoguchi research group and collaborates for the subject on "Materials Design using simulation, atomic resolution analysis, and machine learning". In addition, this assistant professor will belong to the Department of Materials Engineering, Graduate School of Engineering. The candidate must have a Ph.D. in Science or Engineering field, and have effective written communication skills. Each applicant must submit a CV, list of publications, invited talks, and awards, a research statement and the contact information for two referees.

The application must be sent to

Teruyasu Mizoguchi
Postal: Institute of Industrial Science, the University of Tokyo
4-6-1, Komaba, Meguro, Tokyo 153-8505, Japan
e-mail: teru@iis.u-tokyo.ac.jp

The deadline for this application is **Nov. 16th (Fri), 2018**.
